Classy, easy to ride single speeds

Ebikes- Elby electric bicycle

# velofix in Action!

elby- you charge it, it charges you

elby

# Why Commute by Bike?

- AAA reports show the average person driving 15,000 miles a year is spending... over **\$9,000** on their car! **\$9000!!!**
- Elby gets 80-90 miles per a single charge, and 1,000 charges battery life. Conservatively, you're getting over 50,000 miles out of this bike!
- Cheating? Nah! You're still riding! Elby maintains a 15-20 mph speed, but you are still allowed to use bike paths and bike lanes, just like a normal bicycle. Just with a little giddy-up on the hills or when you need it.

# Need more Proof?

- Come TEST RIDE an Elby outside!
- One size fits most- from 5 ft to 6'5" tall
- 4 Levels of assist:
  - L1- 35%
  - L2- 75%
  - L3- 150%
  - L4- 300% assist!

555 Watts of power, Super nova Lighting system, built in rack and fenders, flat resistant tires, and regenerative braking that can recharge 10-15% of your battery.

Applifier, but still a bike. No excuses
